**Dr Michael D Magee : Divine Numerics and the Coming World War** before purchasing it in order to gage whether or not it would be worth my time, and all praised Divine Numerics and the Coming World War:

Did you know that every major war that the USA has fought occurred within a regular time interval? They are not random occurrences. And the season for World War III is 2016-2026. Evidence suggests that God may be using

numbers associated with major recent world events to speak to anyone willing to listen. Dr. Magee coined the term Divine Numerics to distinguish his findings from the less precise term biblical numerology. His substantive perspectives on future events are not presented as dogmatic doctrines, but rather as potential alternatives to mainstream interpretations of Bible prophecy. In reality, this book is two books in one. The first will serve as a timeless, easy to understand reference on biblical numbers. The second contains a hypothetical model that does not make predictions, nor set dates. The model merely attempts to identify high risk periods of time in the world as we move through the next ten-year period.
