Five StarsBy eggsamedeeAll non-muslims should understand this2 of 3 people found the following review helpful. My favorite taqiyya is "Islam means Peace"By

JohnThis book helps you understand Islam and gives you the ability to argue with Muslim Apologists. Islam is about 15% religion and 85% political. You will soon learn the definition of taqiyya, a common practice in Islam. My favorite taqiyya is "Islam means Peace". Or the famous "If you kill one person it's like you've killed all humanity" etc which again is Muhammad ripping off a story of Cain and Abel, Genesis 9. What a joke.

When you realize the true nature of Islam, you may want to persuade others. Then you discover that they have their minds filled with the "establishment" version of Islam and give you their justifications that support it. This book is written for those who want to be effective in persuading others about the true nature of Islam. You learn the powerful method of fact-based reasoning. Since 9/11 these methods have been used to change the minds of supporters of Islam from all political backgrounds. Anyone, whether they are liberals, progressives, leftists or conservatives, can all be persuaded to see the truth in light of the facts about Islam. Since the methods used in this book are based on the sacred source texts of Islam, those who have read the Trilogy of Koran, Sira and Hadith will obtain the full benefit. Others can learn from the examples, but the more facts you have, the better your results. If you want to understand the Trilogy, go to www.politicalislam.com where you can learn about Islam's doctrine with the Foundations of Islam, A Self-Study Course.

About the AuthorBill Warner holds a PhD in physics and math, NC State University, 1968. He has been a university professor, businessman, and applied physicist. He was a Member of the Technical Staff in solid-state physics at the Sarnoff Princeton Laboratories in the area of integrated circuit structures. During the energy crisis of the 80's he founded and ran a company that specialized in energy efficient homes. For eight years he was a professor at Tennessee State University in the Engineering School. Dr. Warner has had a life-long interest in religion and its effects on history. He has studied the source texts of the major religions for decades. Even before the destruction of the World Trade Center he had predicted the war between Islam and America. The day after 9/11 he decided to make the source texts of Islam available for the average person. Dr. Warner's training in scientific theory and mathematics shaped how he analyzed Islamic doctrine. The first step was realizing that the Islamic texts had been made deliberately difficult to read and comprehend. A program, the Trilogy Project (see below), was created to strip away the confusion in the texts. It became clear that Islam is not constructed on the same civilizational principles as the rest of the world. Simple statistical methods revealed that dualism and submission were the foundational principles of Islamic doctrine.
