Lon H. Ferguson, Christopher A. Dr. Janicak : Fundamentals of Fire Protection for the Safety Professional
before purchasing it in order to gage whether or not it would be worth my time, and all praised Fundamentals of Fire Protection for the Safety Professional:

Fundamentals of Fire Protection for the Safety Professional provides safety managers with a guide for incorporating

fire hazard awareness and protection into their safety management plans. Industrial fires pose one of the greatest threats to organizations in terms of financial, human, and property losses. Understanding fire safety basics, the physics of fire, and the properties and classes of common hazards is key to designing fire safety management programs that not only protect an organization's assets but also ensure the safe evacuation of all involved. Fundamentals of Fire Protection for the Safety Professional takes an in-depth look at fire hazards in the workplace from the substances required to do business to the building construction itself and provides practical fire safety principles that can be applied in any work environment. Readers will learn how to develop emergency action plans and fire prevention plans, implement effective alarm and detection systems and fire extinguishment systems, and develop a comprehensive fire program management plan that is in compliance with Federal Emergency Management Agency, Occupational Safety and Health Administration, Environmental Protection Agency, and National Fire Protection Association standards. Each chapter includes a chapter summary and sample problems, making this an ideal training tool in the workplace or the classroom. Answers to chapter questions and a comprehensive glossary and index are provided at the end of the book.

Fundamentals of Fire Protection for the Safety Professional is an absolute "must-have" for any safety or business professional responsible for protecting both people and property. (Midwest Book) About the Author Lon Ferguson, CSP, and Christopher Janicak, CSP, ARM, are Professors of Safety Sciences at Indiana University of Pennsylvania. Dr. Ferguson, chairman of the university's safety department, has worked with PA/OSHA as a compliance consultant and with Liberty Mutual as a fire safety specialist. Dr. Janicak, who teaches fire safety at the university, has worked in the loss control field serving both government and private sector clients.
