Craig Hines : Gateway of the Gods: An Investigation of Fallen Angels, the Nephilim, Alchemy, Climate Change, and the Secret Destiny of the Human Race

before purchasing it in order to gauge whether or not it would be worth my time, and all praised Gateway of the Gods: An Investigation of Fallen Angels, the Nephilim, Alchemy, Climate Change, and the Secret Destiny of the Human Race:

Shedding Light on the Angels By Krestian Excellent, in-depth exploration of the ethos of myth...many a truth has been said in myth, and not in jest either. Hines is honest and forthright about his "lack of credentials," and therein lies the high strangeness index and indivisible believability quotient inherent in his work. Easy to read and understand, in fact, almost conversational in its comfort zone, this book makes the case for angelic beings mixing with the restless natives to produce a race of renown. The Book of Enoch is no fairytale, but instead might be the sine qua non proof of purchase of mankind's alliance, or rather, dalliance with supernal beings. A seamless, engrossing study that seeks to unify and codify conundrums of past and present into a cogent vision of the future, Gateway of the Gods adds a new tack to the age-old puzzle of human origins, and therein lies the rub. What indeed, have we rubbed shoulders (or other parts) with, to have come thus far? With encyclopedia knowledge of ancient cultures, Hines brings a devastating presence to the fore...God, the angels, and the devil may be more real than we know...that is, of flesh and blood, perhaps slightly higher up the evolutionary ladder than our own frail skein. Hines truly knows his stuff...thereby putting such armchair scholars as Sitchin and Heron to shame. Lack of credentials here translates to no lack of street cred. After reading about the Gateway, which could very well be the vehicle of that one-way trip to Dante's, I done seen the light. Myth is necessary, and that necessity is a mother all right. One of the best books I've ever read on this topic. Like I said, no fairytale...this Gateway is by far the best one out of the gate. 17 of 17 people found the following review helpful. Ascension Or Oblivion? ~ Connecting The Dots And Squaring The Circle As We Countdown To 2012 By Brian E. Erland Craig Hines book 'Gateway of the Gods' is an insightful and in-depth exploration on three of my favorite topics (Watchers, Fallen Angels and the Nephilim) and the role these beings play in the ultimate destiny of mankind. The 62 pages that comprise Part 2 of this 432 page volume make this book worth the purchase price. His suggestion and subsequent discussion that the terms 'Son's of God' and 'Nephilim' might refer to not different gradations of angelic beings but actually the same creatures undergoing a title change after their "fall" is masterful and something I had never considered. Mr. Hines makes it so obvious I'm stunned that I could have overlooked that possibility all these years. I also thoroughly enjoyed the brief 20 pages of Part 1 outlining exactly how the author became involved in the research of such esoteric matters. Dreams have always held a great fascination and significance for me and reading how it was through the vehicle of dreams and the necessary follow up confirmation in the waking state started it all made it personal and exciting for me. Part 4 is where it gets a little difficult to follow but that comes from my own lack of expertise in matters of hyperspace, gravity, string and M theory and quantum physics in general. Despite my inadequate level of knowledge in these areas I must say Hines did an admirable and cohesive job at bringing the material together and presenting a comprehensive and understandable analysis that should satisfy both the adept and the novice in these scientific disciplines. If there is anything to find fault with Hines' book it would be trying to cover too much material from such a broad area of subject matter; Theology, mythology, archeology, alchemy, Kabbalah, quantum physics, conspiracy theories, environmental issues and more. However I would prefer to commend the attempt rather than fault him for it. 'Gateway of the Gods' is definitely a challenging read and not for someone looking to wile away a couple of hours before falling asleep. It's extremely dense, at times ponderous, some places overly immersed in detail and a little too abrupt and evasive at the end, but overall satisfying and thought provoking. Like I said, not for everyone, but if you're one of those individuals who love exploring alternative ways of looking at our past and postulating where we might be heading this is definitely something you have to read! 3 of 3 people found the following review helpful. Emotionally and Intellectually Stimulating By Cherie Sumner I have always been intrigued with the accounts of Nephilim in Genesis and the Book of Enoch. I am amazed by the mysterious Pyramids and pondered what their possible uses could entail. Craig Hines really blew my mind with his gateway theory and how history and the bible may elude to this very scenario of angels ascending and descending between dimensions. Every idea he presents is backed with powerful references and research. He is very discerning and knowledgeable with what he presents. I am fascinated and filled with wonder about how flesh and blood humans can be converted to spirit form (resurrection) and vice versa. He has some interesting theories on that. It is a bit disconcerting to think about angels entering our dimension at will. It does make me wonder about their return as we draw to the close of this world. Will we discover the secrets to unlock the portals between this world and theirs? Will Jesus open up the heavens and the gateway for the resurrected ones to enter? Hines stimulated my emotions and intellect all the way through. I am thankful for his recap at the end of each chapter and all the references of his research. Highly recommend for those who want to dig deep into the past of visiting angels and the implications of the repercussions. Will we "square the circle"?

This ground-breaking and provocative book presents new and astonishing interpretations of ancient history, mythology and world religions that will call many established beliefs into question. In Gateway of the Gods, author Craig Hines invites readers to reconsider preconceived notions concerning Biblical theology in light of recent scientific discoveries

and inquiries concerning the nature of the universe. This fascinating exploration reveals a number of ideas that have been suppressed and obscured behind layers of symbolism and misguided propaganda for thousands of years... until now. Why is it that so many world cultures share details of an event when fallen angels descended upon the earth and fathered hybrid offspring called the Nephilim? Is it possible that these beings used "gateway" technology housed within pyramids and holy temples to travel between the heavenly and earthly realms? Do the latest advances in theoretical physics lend credibility to the idea that otherworldly beings might reside in dimensions parallel to our own? Do the recorded voices of the "dead," known as Electronic Voice Phenomena (EVP), indicate that we may be able to communicate with these other realms? Was a secret message embedded within ancient texts that could only be revealed after we have attained the knowledge and technology necessary to understand it? Does this message offer a solution to the approaching environmental disaster that scientists warn will be more devastating to human civilization than any others in recorded history? Drawing from a variety of historical sources and years of meticulous research, the author weaves together a compelling argument involving a range of seemingly disparate topics that when considered together, formulate a radically new narrative concerning the history and destiny of the human race.

From the Back Cover
The Secrets of Heaven are Finally Revealed! "...[Jacob] dreamed, and behold a ladder set up on the earth, and the top of it reached to heaven... [and he saw] the angels of god ascending and descending on it. And he was afraid, and said, 'How dreadful is this place! This is none other but the house of God, and this is the gate of heaven.'" --Genesis 28:12, 17 KJV. About the Author
Craig Hines is a multimedia artist with nearly two decades of experience in the fields of computer graphics, video production, and website design. His interest in computers began at an early age, and has only been rivaled by his fascination with ancient civilizations, paranormal phenomena, science, and technology. His focused research on what would later become *Gateway of the Gods* began in 1999, and continues through today. Hines believes that his training in multimedia, coupled with his knowledge of the paranormal, has given him a unique point of view, whereby he examines how to make the fantastic real and accessible. Hines hopes that his research breathes fresh perspective into the field, and that his methods garner the mainstream respect that has eluded other authors. He encourages discussion of the facts, not agendas, both within the scientific and historical communities, and in the population at large. "Finding the truth of the world around us," Hines states, "will depend upon our ability to be honest and open to fantastic possibilities, yet discerning enough to not blindly accept the fantastic as the only plausible explanation."
