**Oliver Byar Bowh Si : God in Burma: Civil Society and Public Theology in Myanmar** before purchasing it in order to gage whether or not it would be worth my time, and all praised God in Burma: Civil Society and Public Theology in Myanmar:

This book reflects the political and theological views of a Burmese Christian. The author reflects theologically and politically on his own identity and spirituality in the political context of Burma. This book also tries to develop a public theology by critically analyzing and reflecting on religion and politics in Burma from a Christian theological perspective in light of civil society theories.
