Jerry Brotton : Great Maps (Dk Smithsonian) before purchasing it in order to gage whether or not it would be worth my time, and all praised Great Maps (Dk Smithsonian):

100 of 102 people found the following review helpful. Be sure this is what you expected.By Mary L.Just to clarify, while this book is full of colored pictures, the maps are not in great detail. You see segments of maps from afar, so that you may have an overview and a list of maps to research further, but not maps to study. I don't see a review mentioning that.5 of 5 people found the following review helpful. MapsBy the eternal answering machineMy wife gave this to me as a birthday gift, knowing I like to look at maps. There are some amazing ones here. What I like best about it, though, is that on the page after each map, there's a close up of various points and explanations of what you're looking at. The maps progress historically, and they are from cultures throughout the world.0 of 0 people found the following review helpful. He and his father seemed to think it was quite nice! It's a nice historical overview of mapsBy Jen S.I got this for a friend's kid who loves maps. He and his father seemed to think it was quite nice! It's a nice historical overview of maps. Would make for an interesting coffee table book, too, I think!

The world's finest maps explored and explained. From Ptolemy's world map to the Hereford's Mappa Mundi, through Mercator's map of the world to the latest maps of the Moon and Google Earth, Great Maps provides a fascinating overview of cartography through the ages. Revealing the stories behind 55 historical maps by analyzing graphic close-ups, Great Maps also profiles key cartographers and explorers to look why each map was commissioned, who it was for and how they influenced navigation, propaganda, power, art, and politics.

"The greatest maps in history, collected in one fantastic book." Wired.com "[A] visually stunning book." MIC.com "[A] visual treatise much an art book as it is an archaeological history lesson as it is a collection of the world's most fascinating and significant maps." BoingBoing About the Author Jerry Brotton is Professor of Renaissance Studies at Queen Mary College, University of London. He is the author of Trading Territories: Mapping the Early Modern World and A History of the World in Twelve Maps.
