Advancing on the high-tech frontier as the world's most cutting-edge wireless tool, Guinness World Records 2002

Edition is the catalytic reaction of Wireless, Web, and TV within one dynamic print medium. As the world's best-selling copyright book, it's a record-breaking publishing phenomenon! Guinness World Records has historically rocked the best-seller charts selling over 4 million copies last year alone, with publications printed in over 23 different languages. The 2002 Edition represents all things fanatically interactive for the record-breaking obsessed. Providing a navigational journey that allows you to experience true record-breaking mania, its techno iconography challenges you to turn a 2-dimensional image into a 3 dimensional feat using television, the Web, or your own wireless gadgets. Carving new turns in the world of global achievement, fabulous new sections of the book feature the absolute extreme of all extreme sports, online Internet madness, cutting-edge computer games, survival against all odds, anti-gravitational skateboard thrashing, and other limitless experiential opportunities. In addition, all records from Guinness Prime Time TV are listed in the book for the first time ever. But reading isn't a spectator sport-act on the opportunity to interact with the record and experience it as it happened. Follow an icon's lead to the respective record's online site and embark on an opportunity to view this record clip, as well as takes from FOX production that have never before been aired on live TV.

.com Searching for the name of the most tattooed woman, or in desperate need of knowing which NFL team has accomplished the highest number of consecutive wins? As always, the Guinness Book of World Records is the prime source of such top-ranked trivia, and this fancy edition for 2001 is no exception. With its large, hardcover format, bright colors, numerous photos, and quality print job, this book deserves a permanent home on your coffee table. Divided into color-coded sections such as crime, gadgets, spacecraft, weather, sports, and the ever-fascinating human body, you'll find everything from the bestselling hip-hop album (CrazySexyCool by TLC) to the rarest living creature (an Abingdon Island giant tortoise by the name of Lonesome George). Fun high-tech categories include most-visited Web sites (www.france98.com), fastest-selling PC game (Myst), and fastest-spreading worm (the dreaded "I love you"). Showcasing some of mankind's proudest achievements, the two pages devoted to robots present us the slightly absurd "most cocktails mixed by a robot," accomplished by Cynthia and Rastus from Cynthia's Cyberbar, along with many more-practical successes. Young and ambitious readers will find one short section especially inspiring. At the back of the book, specific instructions tell you how to go about setting your own world record, including contact information, guidelines, and suggestions on how to prevail without becoming a world-class athlete or permanently altering your body. Following this helpful information is a list of some of the more unusual accomplishments that resulted in new records: marshmallow nose blow, heaviest ear lift, longest bubble, and fastest ketchup drinker are but a few. Whether you use this book to settle bar bets, entertain the family, or inspire yourself to dizzying heights of personal achievement, it's a sure hit for trivia buffs of all ages. --Jill Lightner
