Dougherty This book is a "must" for researchers of the American Revolutionary War and genealogists working on their family trees. The author put together a list of all known officers in the Continental Army and the various militias in 1892, and this book is a facsimile reproduction of author Heitman's book published in 1893. The author believed that he had entries for 90% of all such officers. The entries mostly give each officer's rank upon entry into service, dates of promotion, units, and other facts such as when captured, paroled, exchanged, killed, etc. However, for serious researchers this book was supplanted by a "New, Revised, and Enlarged Edition" in 1914 (Rare Book Shop Publishing Company) that contains more material, lists and entries. In my own research, the 1914 edition has proven to be more useful, so I recommend it in preference to the 1893 edition. Unfortunately, the 1914 edition is now rare and very difficult to find, so for the average researcher the reprint of the 1893 edition is far better than nothing.

Concon This is a great book for genealogical (also historical) research of ancestors serving as officers in the Continental Army. This book also complements information with another book I use for research: *Encyclopedia of Continental Army Units: Battalions, Regiments and Independent Corps* by Fred Anderson Berg. An excellent combination.

If you're doing any research on family or the Revolution this book will help tell you if a person (Officers only) served, with who and when. Could be helpful to those doing DAR and SAR publications.

This is the standard reference work on the officers of the Revolutionary War, containing an alphabetically arranged list, with service records, of 14,000 officers of the Continental Army, including many officers of the Militia and State Troops who served during the Revolution. The information given includes the soldier's rank, dates of service, when and where wounded, taken prisoner, exchanged, or killed, etc., with the name of the state in which service was rendered and a designation of company and command. Much of the data not being available from official records, other reliable sources of information were consulted and data were added therefrom in order to complete the service record of each officer. Some 6,000 names not recorded in the earlier edition of 1893 were added and a great many records revised and completed for the last published edition of 1914. Also includes a list of French officers who served in the U.S. Army, as well as alphabetical and chronological lists of battles and skirmishes. ". . . This is the best and basic source for identification of Revolutionary War officers."--*The Virginia Genealogist* (Jan.-March 1974).
