of the Christendom set. For twenty plus years now, I have read everything this great Catholic author has written. He has opened my eyes to countless other writers with his references, as well. I have shared all his books with my classes,--and with my own sons. From his "take" on the pharaohs to his account of the Fall of Jerusalem ; from the rise of evil in the Russian revolution to his dissection of the French Revolution and the defense of Cortez-- sweeping panoramic appraisals of HISTORY writ spiritually large, with illumination and inspiration, full of truth and memorable lines. Stirring, like the speech Henry V makes to his troops before Agincourt in the Shakespeare play. He is a Teacher whose teaching was, and is, blessed by the Holy Spirit. His work is amazingly comprehensive. At the same time, it contains marvelous vignettes of individual characters and colorful accounts of pivotal battle scenes. Unashamedly Catholic in the way he deals with church-related events and figures, accepting the traditional view of Divine Providence and the authenticity of miracles such as those that occurred at Lourdes and Fatima, he is also cosmopolitan enough in his outlook to appeal to everyone. 2 of 2 people found the following review helpful. It is an excellent and updated source in the study of Modern Church ... By Emilio Edgardo A. Quilatan This book on Church History touches the modern period and it gives us a review of the last century and the role of the Holy Father in shaping our Catholic Church today, i.e., from the pontificate of Leo XIII to the reign of Pope Benedict XVI. The political scenario gives us the historical background on how the Catholic experienced the world she is living in and how she responded to its challenges. It is an excellent and updated source in the study of Modern Church History.

The Crisis of Christendom is the sixth and final volume of Dr. Warren H. Carroll's history of Christendom. It is concerned with the crises, or turning points, in the diseases which plagued humanity during the modern era. The book discusses in detail Nazi and Japanese militarism and its crisis in World War II, the inhuman system of Communism and its fall in 1989, and the origins and consequences of the denial of human dignity in the modern culture of death. Carroll shows the power of evil in the twentieth century, but focuses also on the great popes, in particular Pope John Paul II, and the great apparitions of the Marian Century. He ends with a call to hope and action. As did earlier volumes in this sweeping series, The Crisis of Christendom reflects an unabashedly Christian and Catholic view of history, taking as one of its major themes the centrality of the Papacy to the destiny of the West. Dr. Carroll holds that God and individual men and women, not impersonal social and economic forces, make history. The characters and actions of these history-makers, both good and evil, are vividly depicted as essential elements in the triumphs and tragedies of Christian civilization in Europe and the New World for two centuries (1815-2010). Both a gripping, dramatic narrative and an indispensable work of reference for Christian history, this volume, and the entire series of which it is a part, belong in the library of every serious Catholic who desires to understand the work that Christ has done in the world through His Church and His faithful people. How would a historical narrative read if the author began with the first principles that truth exists and the Incarnation happened? The long-awaited sixth and final volume to the late Warren Carroll's highly regarded history of Christendom covers the years 1815 through 2005. This series is the only in-print, comprehensive narration of Western history written from an orthodox Catholic perspective.
