**From Dunbar William : The Forgotten Expedition, 18041805: The Louisiana Purchase Journals of Dunbar and Hunter** before purchasing it in order to gage whether or not it would be worth my time, and all praised The Forgotten Expedition, 18041805: The Louisiana Purchase Journals of Dunbar and Hunter:

0 of 0 people found the following review helpful. I have always loved this river and I enjoyed reading a about this

...By Ricky Smith This expedition on the Ouachita River in 1804 has truly been forgotten. The Fort Miro mentioned in this journal later became the city of Monroe, where I grew up. I have always loved this river and I enjoyed reading about this early expedition by these two gifted men. 0 of 0 people found the following review helpful. Worth the journey and the price. By R. Stanley As a Louisiana native, I have always been interested in our states history, even when it stretched to Canada! This journal is very well reviewed and I enjoy the day to day progression of these early explorers. Using Bing.com or Google earth, I am able to zoom in on the Arial view and step back in time a bit. I feel my money was well spent. 0 of 0 people found the following review helpful. Unique By Mike Although this book gives an early history of central Arkansas it doesn't have the details found in the notes of Lewis and Clark.

At the same time that he charged Meriwether Lewis and William Clark to explore the great Northwest, President Thomas Jefferson commissioned William Dunbar and George Hunter to make a parallel journey through the southern unmapped regions of the Louisiana Purchase. From October 16, 1804, to January 26, 1805, Dunbar and Hunter, both renowned scientists, made their way through what is now northern Louisiana and southern Arkansas, ascending the Ouachita River and investigating the natural curiosity called "the hot springs." The Forgotten Expedition, 1804-1805 represents the first time that their daily journals -- which describe the flora and fauna, geology, weather, and native peoples they encountered along the way -- appear in a single volume. The team of the "Grand Expedition," as it was optimistically named, was the first to send its findings on the newly annexed territory to the president, who received Dunbar and Hunter's detailed journals with pleasure. They include descriptions of flora and fauna, geology, weather, landscapes, and native peoples and European settlers, as well as astronomical and navigational records that allowed the first accurate English maps of the region and its waterways to be produced. Their scientific experiments conducted at the hot springs may be among the first to discover a microscopic phenomena still under research today. Extensively annotated and carefully researched, The Forgotten Expedition completes the picture of the Louisiana Purchase presented through the journals of explorers Lewis and Clark, Zebulon Pike, and Thomas Freeman and Peter Custis. It is a treasure of the early natural history of North America and the first depiction of this new U.S. southern frontier.

About the Author Trey Berry is a professor of history at Ouachita Baptist University in Arkadelphia, Arkansas. He served as project director for the documentary film The Forgotten Expedition: The Journey of Dunbar and Hunter. Pam Beasley is the director of the Arkansas Museum of Natural Resources in Smackover, Arkansas. Jeanne Clements retired as education director of the Arkansas Museum of Natural Resources in 2003. She lives in Tucson, Arizona.
